Opportunity management

Account and contact management

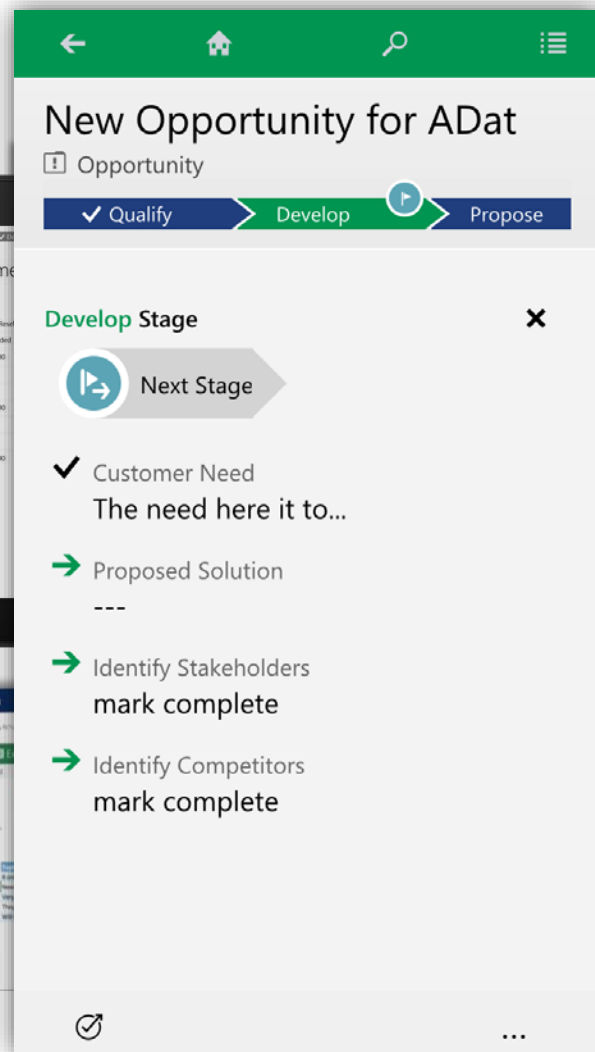

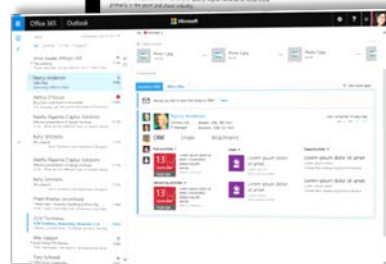

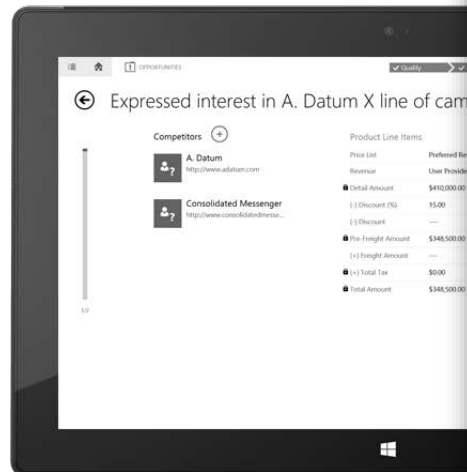

Complete access on par with web experience to management of the basics is table stakes.

Guided selling

Process Flow and Activity management clearly show appropriate next steps while on the og.

Collaboration tools

Mobile availability of Skype for Business, Yammer, Office 365 Groups, and OneNote are available and connected with new App-to-App deep linking.

Social selling

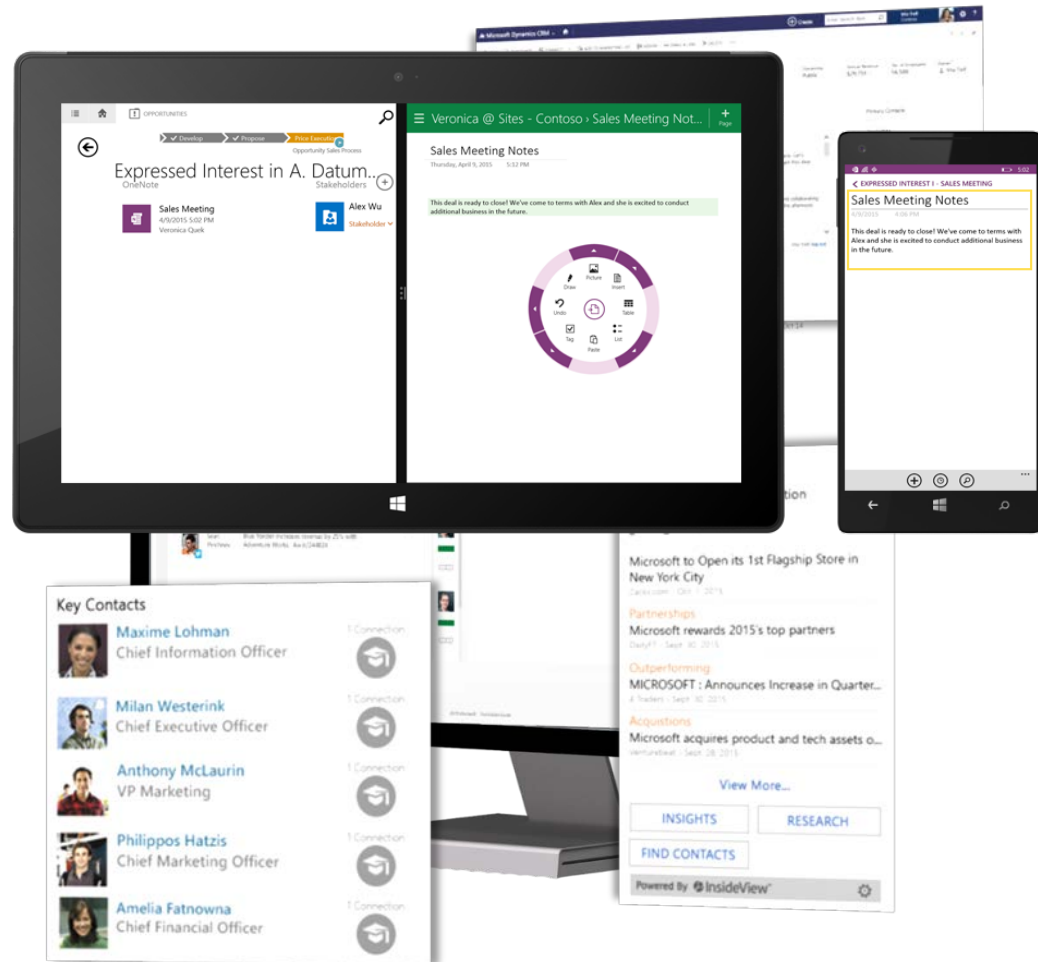

Buying signals

Find more leads by using social to identify and act on buying signals and create leads based on social posts, with Microsoft Social Engagement.

Automating triggers can send notification to users via mobile SMS to alert them of these activities.

Team Selling

Have an omnipresent white board for ideas and tracking customer information all in one place on any device with OneNote.

Planning and management

Performance management

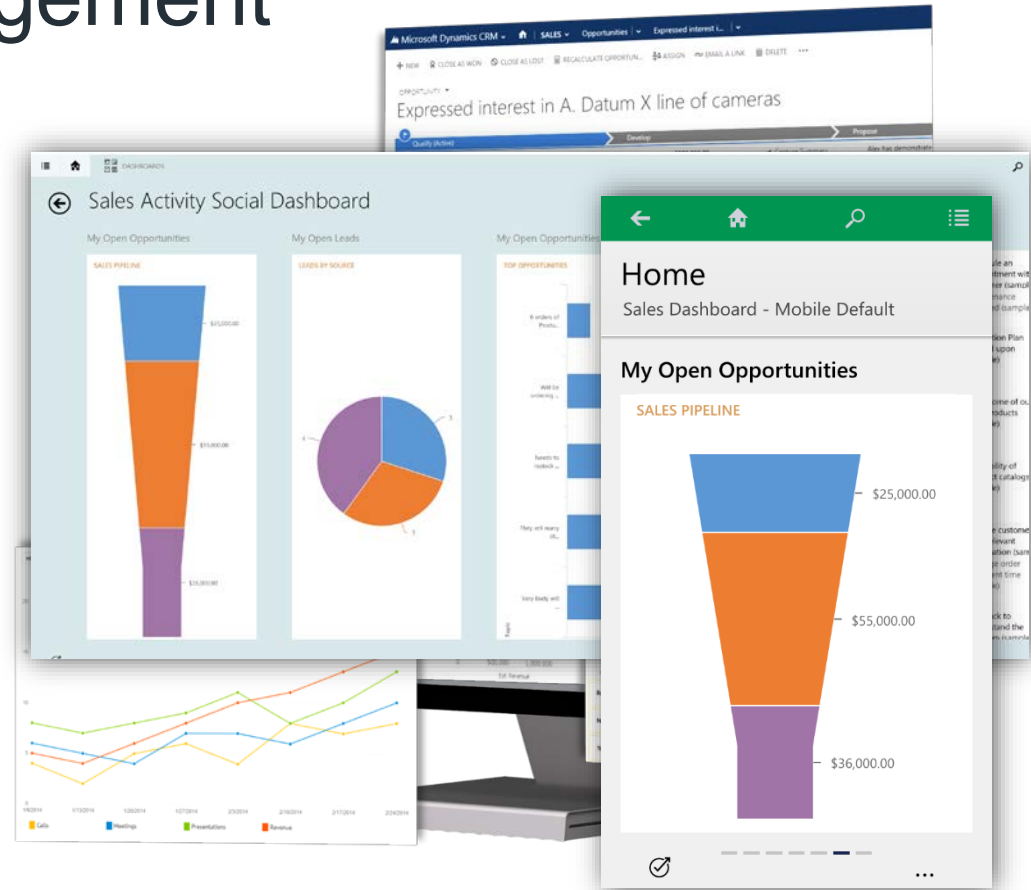

Personal Dashboards and Views are available to turn on for Mobile visibility, allowing personalization of the mobile tool, just like web!

Gamification

Mobile provides easy access to CRM so Sales users have less barriers to participate without getting to full web experience.

Business process management

Complete business process and business rules are fully functional while in CRM Mobile Apps. All of the back end server-side business logic processes execute just like they would. When offline those processes execute at the time of go online event.

Mobile Content collaboration

Document authoring

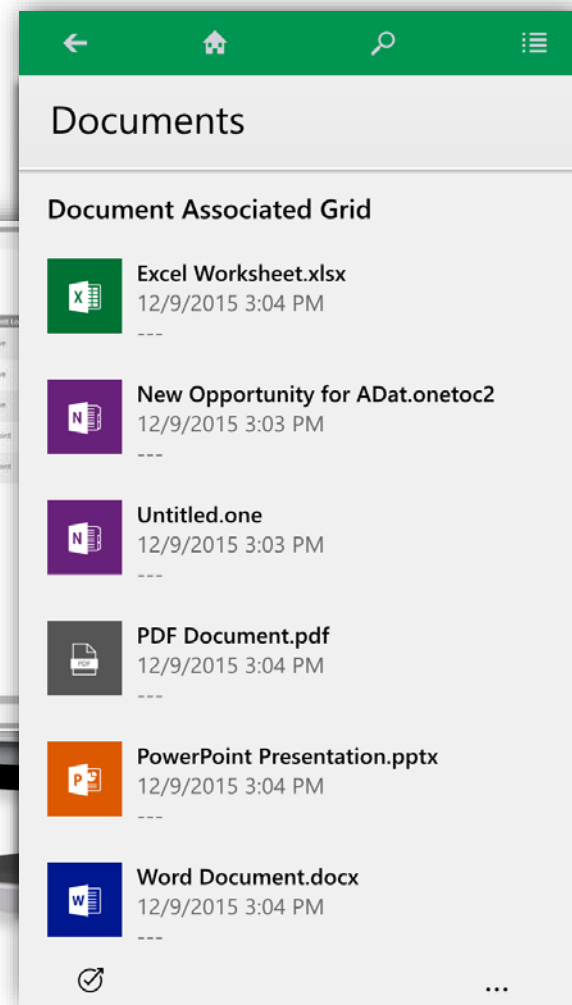

Create personalized sales documents using Word or Excel templates – generating templates on the go via CRM Mobile App like never before!

Document management

Manage contextual CRM documents across SharePoint, Office 365 Groups, and OneDrive for Business are all enable on the go.

Content discovery

Relevant content comes to you with Delve based on what you are working on and who you're working with.
