

PowerAttachment Utility Instructions

The PowerAttachment Utility is a free tool used to move attachments in your CRM that were uploaded prior to the solution being imported into your environment. Simply unzip and extract the file on your desktop and run the application. You will need to enter your org URL and credentials. If you have a lot of prior attachments, please make sure you run this tool on a system that does not go to sleep or hibernate as this will cause the tool to timeout.

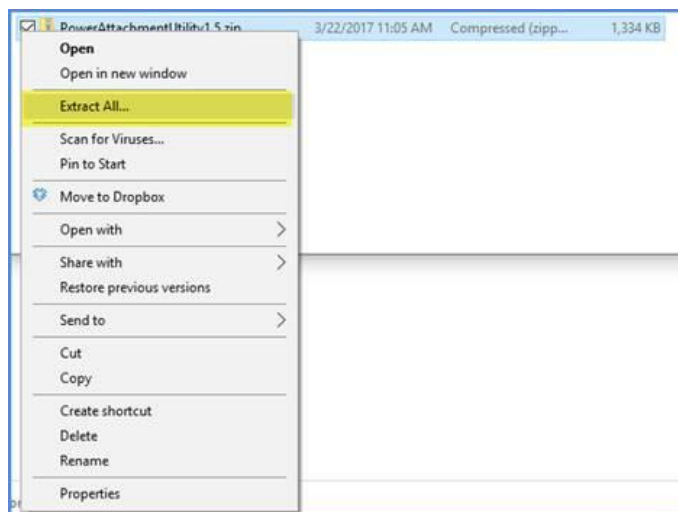

Note: Please make sure you have imported and registered for a trial of the PowerAttachment add-on before attempting to run the utility.

To download and run the PowerAttachment Utility follow the steps outlined below:

1. Navigate to the [PowerAttachment](#) page on PowerObjects.com. Click the “Download Solution” button and select “Download” under the PowerAttachment Utility header.

2. Once the solution has downloaded to your computer successfully, Unzip the file.

3. Once extracted, open the .exe file:

Name	Date modified	Type	Size
AntiXSSLibrary.dll	3/22/2017 11:06 AM	Application extens...	63 KB
Microsoft.Crm.Sdk.Proxy.dll	3/22/2017 11:06 AM	Application extens...	273 KB
